**Don Cislo, President and CEO:**

**Mr. Cislo has over 20 years of executive and operational experience in the U.S. communications industry. He has successfully and profitably managed many companies as well as successfully started, built and developed Antenex, Inc. His strengths are his strong market instincts and operations experience as well as a sound financial and business judgment.**

**Mr. Cislo attended the Lake Forest Graduate School of Management, is a shareholder and advisor to the Bloomingdale Bank and Trust. He is an accomplished private pilot and also enjoys canoeing, kayaking, biking and cross country skiing.**

#### **ANTENEX, INC. COMPANY BACKGROUND**

**Antenex Inc. is a leading manufacturer of high quality mobile, portable, and base antennas for wireless voice and data, military, public safety, and other mission-critical communications applications in the U.S. and abroad. Antenex maintains active customer relationships with large corporations such as The Boeing Company, NASA, Motorola, Raytheon, Siemens and Lockheed Martin as well as major government accounts including U.S. Army, California Highway Patrol (CHiPs), Florida Highway Patrol, U.S Forest Service and the U.S. Border Patrol.**

**Our success has been the result of offering many useful patented technologies and innovations. We provide strong branding and customer good will through the delivery of quality products and high customer service through a vast distribution network including many value added communications dealers. The Antenex brand is respected and highly visible on police and fire public safety vehicles as well as major taxi and limousine fleets in most North American cities.**

**Antenex patented technology was selected for use on U.S. Army Apache attack helicopters, Chinook and Blackhawk helicopters as well as Bradley and Humvee vehicles as a critical component in the U.S. army's satellite based friend/foe identification system currently in use.**

**We have also successfully leveraged patented technologies for deployment in a variety of original manufactured wireless devices.**

#### **THE MISSION GOAL IS TO EVALUATE THE FOLLOWING INTERESTS**

**We seek small to mid sized Chinese companies as partners to supply quality components and finished products. These include molded and machined parts, stainless steel, injection mold tooling and castings as well as high quality finished antenna products for private label distribution.**

**There is also a possible interest in establishing a research and development facility in China as well as agents or distributors for our products in China.**

**We also seek import and investment opportunities outside of and independent of our core product specialty.**
